# Annales Geophysicae

Sun, Earth, planets, and planetary systems

- **Impact Factor: 1.621 (2017)**
- on average 119 days from submission to publication (2017)
- indexed in the Science Citation Index, Science Citation Index Expanded (Web of Science), Current Contents, Scopus, GeoBase, Chemical Abstracts, DOAJ, and others
- archived in Portico & CLOCKSS

An interactive open-access journal of the European Geosciences Union

**IF: 1.621 | 119 days to publish**

-  OPEN ACCESS
-  INTERACTIVE PUBLIC PEER REVIEW
-  ARTICLE LEVEL METRICS
-  MODERATE ARTICLE PROCESSING CHARGES
-  ARCHIVING & INDEXING

## Interactive Public Peer Review™

- manuscript posted in the ANGEOD discussion forum
- public discussion by the scientific community
- open access to referee reports
- post-discussion editor decision
- authors' revision and peer-review completion
- final journal publication – fully peer-reviewed

1. Submission
2. Access review
3. Technical corrections
4. MS posted in ANGEOD forum
5. Public discussion
6. Final response
7. Post-discussion editor decision
8. Revision
9. Peer-review completion
10. Final revised publication

## Aims and scope

Annales Geophysicae (ANGEOD) is an international, multi- and inter-disciplinary scientific open-access journal in the field of solar-terrestrial and planetary sciences. ANGEOD publishes original articles and short communications (letters) on research of the Sun-Earth system, including the science of space weather, solar-terrestrial plasma physics, the Earth's ionosphere and atmosphere, the magnetosphere, and the study of planets and planetary systems, the interaction between the different spheres of a planet, and the interaction across the planetary system. Topics range from space weathering, planetary magnetic field, and planetary interior and surface dynamics to the formation and evolution of planetary systems, as specified in one or more of the following fields:

- solar corona & heliospheric physics;
- magnetosphere & space plasma physics;
- ionosphere & aeronomy;
- atmosphere and its relation to the Sun;
- terrestrial planet systems;
- small bodies to dust, including dwarf planets, asteroids, and comets;
- giant planet systems;
- space weather, climate, habitability, and life in the (exo-)planetary context;
- exoplanet systems.
